Re: CC Docket 94-102
Illinois Valley Cellular RSA 2-I Partnership
Illinois Valley Cellular RSA 2-II Partnership
Illinois Valley Cellular RSA 2-III Partnership

Dear Ms. Dortch:

On behalf of Illinois Valley Cellular RSA 2-I Partnership, Illinois Valley Cellular RSA 2-II Partnership and Illinois Valley Cellular RSA 2-III Partnership (collectively "Illinois Valley Cellular") there is submitted herewith a report of the status of the carrier's progress in achieving 95% systemwide handset of location-capable handsets.

Illinois Valley Cellular is a Tier III digital wireless carrier operating cellular radiotelephone services in portions of Illinois RSA 2B. This report is submitted in compliance with the terms of the *Order*, CC Docket No. 94-102, FCC 05-182, released October 28, 2005, conditionally granting Illinois Valley Cellular an extension through December 31, 2006, of the deadline for compliance with Section 20.18(g)(1)(v) of FCC rules, 47 C.F.R. § 20.18(g)(1)(v).

Pursuant to Sections 0.457(d) and 0.459 of FCC Rules, it is hereby requested that the information reported herein, in the narrative report and attached spreadsheet, be treated by the Commission as confidential, and be withheld from public inspection. The information, which would not customarily be released to the public, is confidential commercial information, and should be protected in accordance with Sections 0.457(d) and 0.459 of FCC Rules.

E911 REPORT

MAY 1, 2006

The following information is submitted in accordance with FCC directive:

1. The number and status of Phase II requests from Public Safety Answering Points

Within the wireless service area of Illinois Valley Cellular, there are a total of eleven PSAPs. Of those, ten have requested Phase II services. To the best of Illinois Valley Cellular's knowledge, all have become or will become capable of receiving and utilizing Phase II data. Illinois Valley Cellular is presently delivering Phase II data to seven of those PSAPs.

2. The estimated dates on which Phase II service will be available to PSAPs served by Illinois Valley Cellular's network

Since the filing of its last quarterly report Illinois Valley Cellular has begun to provide Phase II services to the Iroquois County PSAP. Illinois Valley Cellular is ready to deliver Phase II data to the additional three requesting PSAPs, the City of LaSalle, the City of Peru and the County of Livingston, either within their six-month timelines or pursuant to the alternative schedule of the PSAP. Deployment is expected to be achieved in the coming weeks, as soon as the PSAPs are ready.

3. The status of coordination efforts with PSAPs for alternative 95% handset penetration dates

Illinois Valley Cellular is actively working with the PSAPs to keep them informed of its progress in achieving higher location-capable handset penetration rates. Brian Boezeman, of Intrado, contacts each PSAP on a regular basis to report the penetration figure. The response of each PSAP has been positive. No PSAP has expressed objection to the projected schedule.

4. Efforts to encourage customers to upgrade to location-capable handsets

By means of billing inserts, direct mail, signage and print advertising, customers are being informed that by upgrading their handsets they will have increased coverage and enhanced ability to stay in touch with family at competitive rates. Illinois Valley Cellular's advertising campaigns feature CDMA phones and emphasize their location assistance capabilities. Ads target TDMA and analog customers with special offers for location capable handsets. Promotional offerings include financial incentives for conversion to new CDMA phones, all of which are location capable. Promotions for phones with cameras, ringtones, color screens and other features encourage customers to upgrade their handsets. Promotions entice existing customers into visiting one of Illinois Valley Cellular's retail stores where only location-capable phones are sold, and where TDMA and

analog customers can be educated about the benefits of CDMA and E911 location capabilities. Qualifying customers are eligible for a free handset upgrade.

5. The extent of subscribers located in areas with analog service only

Illinois Valley Cellular's service area is almost entirely covered by the carrier's CDMA signal, as depicted on the attached coverage area map. During the month of March, only one-half of one percent of all of the minutes of use on the system were conducted using an analog signal. Of thirty-nine cells in the system, three are CDMA-only. Illinois Valley Cellular plans to construct at least five new CDMA-only cells per year over the next three years.

6. The percentage of customers with location-capable phones

Approximately 87% of Illinois Valley Cellular's subscribers are presently using Phase II location-capable handsets.

6. Status in achieving compliance and whether Illinois Valley Cellular is on schedule to meet its revised 10/28/06 deadline

Illinois Valley Cellular maintains its policy of selling and activating only location-capable digital handsets. It continues to augment its CDMA network facilities and to conduct marketing campaigns to encourage consumer adoption of new handsets. The penetration rate of location capable handsets is increasing, and Illinois Valley Cellular expects to be compliant no later than December 31, 2006.

Important Messages

AMBER ALERT

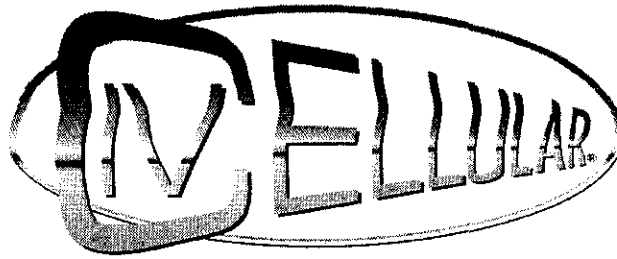

The AMBER Alert Plan is a voluntary partnership between law enforcement and broadcasters to activate an urgent bulletin in the most serious child abduction cases. SMS text messages are sent to the handsets of the subscribers. Illinois Valley Cellular has become a recent participant in this program. You can sign up on our web site at www.ivcellular.com or call 611 and have one of our trained customer relations representatives walk you through the setup.

ARE YOU SAFE IN AN EMERGENCY?

Unlike your home phone, some older model cell phones are unable to send location information during an emergency call. Bring your handset into your local Illinois Valley Cellular location and have them check to make sure your phone is E-911 compliant. *Plus, you may qualify for a free upgrade on new equipment.*

YOUR ACCOUNT INFORMATION IS SAFE

Illinois Valley Cellular's business practices are certified with the FCC to protect your privacy. Recently there has been a lot of publicity in the news on agencies attempting to fraudulently obtain call detail information on customer accounts. This has prompted immediate action by the FCC to have all wireless carriers certify in writing the security measures they take as a business to protect the privacy of a customer's account information and most importantly their call detail information. Our business practices require authorization and verification before releasing any information on your IVC account. Please be patient with our representatives when making account inquiries. If you have any questions regarding our business policies on the security of your IVC account information, please call 611 or 1-800-438-4824.

Dear Valued Customer:

Did you know that most Enhanced 911 (E911) systems have the capability of locating your wireless phone within 50 to 300 meters? If you were involved in a car accident or experiencing extreme winter weather conditions, wouldn't it be comforting to know that just by dialing 911 on your E911 capable wireless phone your local police could find you?

IV Cellular shares that desire. We have checked our records and we show that your current phone is not E911 capable. You can call 911 but it cannot pinpoint the exact location of the call. We highly recommend that you stop into one of our agent or retail stores to view our wide selection of location capable phones.

If you have any questions, you can call our Customer Relations Department at 800-438-4824 or by dialing 611 on your cellular phone.

Thank you for your prompt attention to this very important matter.

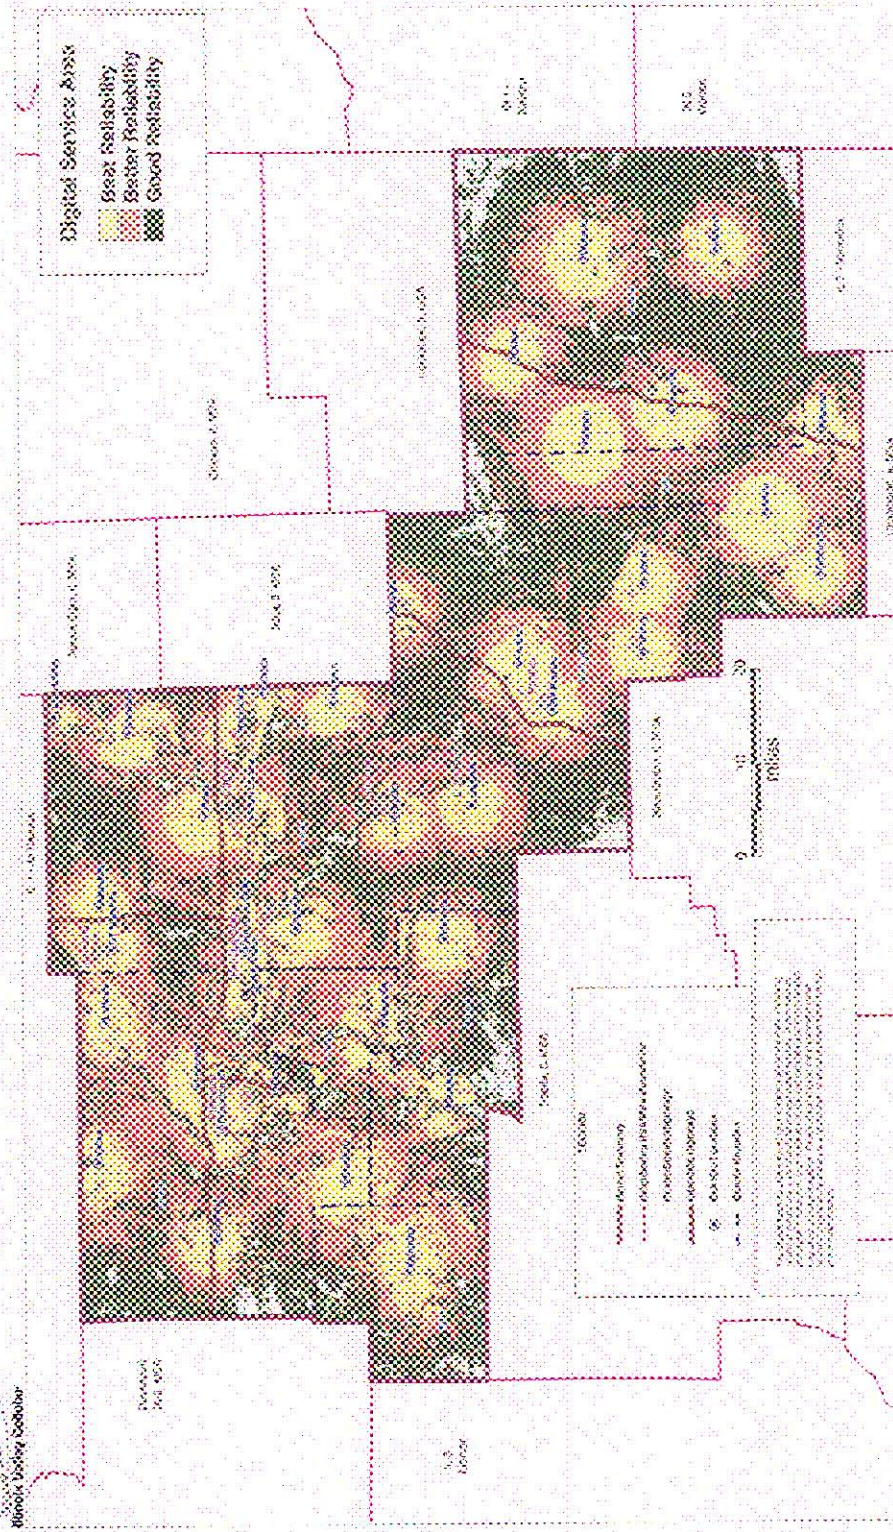

Sincerely,

Thomas F Walsh
